Objective

As a computer science student, I am driven by the critical role technology plays in the modern financial sector. I understand that continuous evolution is a constant in this industry, which fuels my passion for mastering emerging technologies like machine learning, secure cloud platforms and data analytics. My objective is to apply these skills to develop robust, efficient and secure solutions that address complex financial challenges. I am a proactive learner and a collaborative team player, eager to contribute to an innovative team that is shaping the future of finance and technology.

Education

- **PSG College of Technology**, Coimbatore
B.E. Computer Science and Engineering (G2)
Batch: 2024 – Present | **CGPA (Upto Sem 3): 8.41**
 - **Maharishi Vidya Mandir School**, Chennai
HSC (2022-2024) – Board Exam Percentage: 93%
 - **The PSBB Millennium School**, Coimbatore
SSLC (2022) – Board Exam Percentage: 94.2%
-

Experience

Executive Member, GitHub Campus Club- PSGTECH, India (GHCC)

- Leading tech projects and recruitment for the club, conducted 5 workshops and competitions with high participation.
- Involvement in Key GHCC events: Coordinated event resource management and publicity (Infinitum – February 2026), Backend Development (Triwizard Tech Tournament – September 2025), Supported technical content creation (Codopoly, Kriya'25 – March 2025).

Internship Experience

Intern

Redington, Chennai | On-Site | July 2025

- Designed internal newsletters and communication material using Figma and Canva, contributing to improved clarity and visual engagement for internal teams.
- Gained exposure to tools such as the Redington Whatsup interface and e-Commerce dashboards, enhancing the documentation and coordination of the process.

Intern

AWS Security User Group (APAC) | Online | July 2025

- Designed a simple, scalable hosting architecture using Elastic Beanstalk to resolve slow response times for a growing client.
 - Described my proposed architecture in plain language, ensuring my client understood how it works and how costs will be calculated for it.
-

Technical Skills

- **Programming:** Python, C, JavaScript, Java
 - **Tools:** Git, GitHub, Figma, VS Code, Godot Engine (Gaming), Postman (Testing)
 - **Databases :** MongoDB, SQL
 - **Web Technologies:** HTML, CSS, JavaScript, Node.js, React.js, REST APIs, Backend Web development, Pygame (Python's gaming library)
 - **Version Control:** Git, GitHub
-

Projects

1) **Infinitum Stickman Game**

Tools: Godot | February 2026

- Built a 2D stickman game using the Godot Engine as part of the Infinitum event.

2) **Triwizard Tech Tournament Portal**

Tools: MERN Stack | September 2025

- Built the backend for a coding tournament portal using Node.js and MongoDB, handling user authentication, contest management and submissions.

3) **Portfolio Website**

Tools: HTML, CSS and JavaScript | May 2025

- Built a personal portfolio website from scratch to showcase projects.
